Princi Srivastava

Cybersecurity student and software builder · Bengaluru, India

princisrivastava1011@gmail.com · github.com/princi143 · LinkedIn · Portfolio

Education

Sri Venkateshwara College of Engineering, Bengaluru 2025 – present

B.E. Computer Science & Engineering (Cybersecurity) · CGPA 9.15 / 10

Kendriya Vidyalaya No. 2, Jalahalli East, Bengaluru 2013 – 2025

Class I – XII. Represented the school at the KVS National Sports Meet.

Projects

FinSync — Tax intelligence & reconciliation 2026

Python pipeline that normalises multi-broker trade exports (Zerodha, Groww), removes duplicates, computes capital gains and flags AIS / 26AS mismatches. Built the parsing, de-duplication and tax-classification logic.

Safe-Twin — Failure-cascade digital twin (hackathon) 2026

Models machine dependency graphs and simulates failure cascades to suggest safe maintenance windows. React, FastAPI, ML risk scoring, React Flow. Built the topology visualiser and live simulation dashboard.

TrustIQ — AI model marketplace & trust benchmark 2026

Compares AI models on trust, latency and cost with a conversational recommender. Designed the recommendation pipeline and evaluation metric cards.

Schedulink — Appointment & scheduling platform 2026

Real-time provider availability and booking. HTML, CSS, JavaScript, Python. Built the booking flow, scheduling logic and UI.

Achievements

1st place, Idea Expo — Cyber Security Dept., SVCE 2025 – 26

Presented and defended a security architecture to the department jury.

CodeFury 9.0 (IEEE UVCE) — Top 30 of 160+ teams 2025 – 26

ISRO Planetary Defence Workshop — selected participant 2026

Sessions on orbital monitoring; interacted with the ISRO Chairman and senior scientists.

Bharatiya Antariksh Hackathon (ISRO, Hack2skill) — idea submitted 2026

Certifications

AI in Cybersecurity Fundamentals — Wingspan Aug 2026

Cybersecurity Job Simulation — Forage Aug 2026

Partnering with AI in the Workplace Job Simulation — Forage Sep 2026

Skills

Languages: Python, JavaScript
Web: HTML, CSS, Tailwind, React, Vite
Backend & data: FastAPI, MySQL, SQLite, Pandas
AI & vision: OpenCV, MediaPipe, YOLOv8, PyTorch
Tools: Git, GitHub, VS Code
Foundations: Data structures & algorithms, network security
